Phone: +7 917 702 46 76

QUALIFICATIONS

- Ruby 2.x, Ruby On Rails (3.x, 4.x, 5.x) and solid suite of popular gems
- GIT, HTML, CSS, SCSS, HAML, SLIM
- Twitter Bootstrap, Zurb Foundation
- JQuery, AJAX, CoffeeScript
- Redis, Sidekiq, DelayedJob
- Rspec, Capybara, Timecop
- PostgreSQL, MySQL
- DigitalOcean, NGNIX, Passenger, Unicorn
- Capistrano, Foreman
- Semaphore, CodeClimate, Rubocop
- Amazon S3
- Slack, Trello, Redmine
- Good writing / listening English skills

WORK EXPERIENCE

southbridge.io

december 2017 — july 2018

Ruby On Rails developer

'Southbridge' provides stable server operations, setup and support of server infrastructures for WEB, data and telephony. <https://southbridge.io/en>

Southbridge has own internal CRM WEB application based on Rails 5.1, which provides the full stack of all necessary CRM features needed in organisation for:

- clients
- employees
- financial calculations of salaries for stuff depends on tasks completed for date range
- documenting
- invoices, so on

The rest of period of working in southbridge.io I was working on this application.

My duties were:

- implement new V2 version of internal CRM WEB application along with other developers in team
- investigation of issues and making bugfixes for existing functionality
- problem solving, decision making on fly
- speed performance optimization of existing parts of application
- improving of test coverage
- assist to junior teammates (making introductions for new members, code reviews)

Technology stack:

- GIT, Ruby 2.x, Ruby On Rails 5.1
- PostgreSQL
- SLIM, SCSS, CoffeeScript, Twitter Bootstrap 3

- NGINX, Puma, Capistrano
- Rspec, Capybara, Parallel spec tool

Gaspier LTD

July 2017 — december 2017

Ruby On Rails developer

GasPier is the startup based in United States <http://www.gaspier.com/>

This is probably the future of oil trading in United States.

Just imagine: you are the owner of couple of fuel stations in your city.

Your company offers 3 types of fuel (92, 95, 98) for vehicles.

Your company works with dozen of different suppliers in a country.

As all we know: oil prices are changing every day/hour/minute.

And each supplier having different prices for each type of fuel.

You as fuel station owner prefer to buy fuel with best prices.

So that today, you can buy 92 from LUKOIL supplier because it has best price for now and 95 from TATNEFT so on.

This process require you to monitor all your suppliers, prices, make orders, invoices so on.

In practice, if you have more than 1 fuel station you would need a supplier department, which is expensive.

So, GasPier solves this problem.

It provides you full cycle of monitoring, invoicing, ordering and statistics.

My duties were:

- support tasks (bug fixing, investigation of issues)
- and developing of new features
- sprint planning along with team and estimations
- rest API for Android and IOS applications

Technology stack:

- GIT, Ruby 2.x, Ruby On Rails 5.0.4
- PostgreSQL
- SLIM, SCSS, CoffeeScript, Twitter Bootstrap 3
- HEROKU
- Rspec, Capybara

CUBEALBUM.RU

September 2016 — July 2017

Ruby On Rails developer

Online photo book service www.cubealbum.ru

The main idea of this application is to provide people ability to create photo books of their dream.

Application allows you to get pictures from your instagram account, pictures from celebrities public instagrams

or load them from your devise or PC.

Then you can crop them, add filters and titles, reorder them, select cover and make an order online.

After couple of days service team will send you your photo book via post.

My duties were:

- support tasks (bug fixing, investigation of issues)

- and developing of new features
- discussions with client
- sprint planning along with team and estimations
- speed performance optimization of application

Technology stack:

- GIT, Ruby 2.x, Ruby On Rails 4.2.x
- PostgreSQL
- SLIM, SCSS, CoffeeScript, Twitter Bootstrap 3
- Digital Ocean, NGINX, Passenger, Capistrano
- Rspec, Capybara

SNYAT.COM LTD

October 2015 — September 2016

Junior Ruby On Rails developer

Real Estate Agency portal SNYAT.COM

The main idea of this application is to find flat owners and avoid of agent fees when you are trying to rent a flat.

In other words, it is aggregation app which pulls advertisements about renting flats, parses them and then allow paid access to members.

* Currently application is not in LIVE, because business owners decided to close it at the end of 2016.

My duties were:

- support tasks (bug fixing, investigation of issues)
- and developing of new features

Technology stack:

- GIT, Ruby 1.9, Ruby On Rails 3.2.x
- MySQL
- HTML, CSS, CoffeeScript, Twitter Bootstrap 2
- Rspec, Capybara
- Digital Ocean, NGINX, Unicorn, Capistrano

CODE SAMPLES

▪ **Rails v5 application - Event Calendar**

Web-application allows you to create personal private and public events, follow up other users and view them public events.

Github: https://github.com/wowonrails/event_calendar

Code Climate: https://codeclimate.com/github/wowonrails/event_calendar

Staging: <https://event-calendar-wowonrails.herokuapp.com/>

▪ **Pure Ruby code sample: Sequence of numbers generation script**

Implementation of script, which generates sequence of numbers by conditions.

Detailed description of idea at:

https://github.com/wowonrails/sequence_of_numbers/blob/master/README.md

Github: https://github.com/wowonrails/sequence_of_numbers

OPEN SOURCE CONTRIBUTIONS

■ Rails v5 application - wowonrails.com

My personal developer website.

Github: <https://github.com/wowonrails/wowonrails.com>

Staging: wowonrails.com

1) AWS Rekognition API client gem:

AWS Rekognition API client for Rails

My open source project.

This gem allows to connect with Amazon Rekognition Service such as Detect Labels. It can be used to scenes and objects of images.

Github: <https://github.com/wowonrails/aws-rekognition-client>

Code climate: <https://codeclimate.com/github/wowonrails/aws-rekognition-client>

AWS Rekognition API client Ruby On Rails 5 demo application

Demonstrates the work of gem 'aws-rekognition-client'.

Github: <https://github.com/wowonrails/aws-rekognition-client-demo>

Demo server: <https://github.com/wowonrails/aws-rekognition-client-demo>

2) CSV File Manager gem

My open source project - I'm currently working on it when I have some spare time. CSV data store implementation of Active Record.

Github: <https://github.com/wowonrails/csv-file-manager>

Code climate: <https://codeclimate.com/github/wowonrails/csv-file-manager>

3) My pull requests into open source fs/rails-base repository:

This is skeleton for new Ruby On Rails applications, used by

<http://www.flatstack.com/> company.

I like this project, so that sometimes when I have some spare time I'm contributing it.

Here are list of my latest PRs into it:

<https://github.com/fs/rails-base/pull/508>

<https://github.com/fs/rails-base/pull/509>

<https://github.com/fs/rails-base/pull/510>

RECOMMENDATIONS

SOUTHBRIDGE.IO FOUNDER Олемской Игорьь Александрович:

Выражаю Владимиру благодарность за вклад в развитие нашего проекта.

Владимир проявил себя как ответственный и очень креативный разработчик.

Всегда стремиться развиваться как специалист и внедрять новые технологии и инструменты.

Буду рад сотрудничать снова.

GASPIER.COM CTO Mohamed Nasr:

Vladimir is very productive person.

Hardworking and energetic engineer with great skill to analyze and summarize solutions.

Smart and proactive.

It is amazing to work with such a person.

CUBEALBUM.RU CTO Damir Safin:

С Владимиром мы проработали около года. За весь период работы Владимир показал себя как ответственный и трудолюбивый сотрудник, который может при необходимости поработать, как ночью, так и в выходной день.

Когда Владимир пришел в нашу команду, в приложении, мягко говоря, царили хаос и неразбериха. Наследие предыдущих членов команды, в виде непокрытого тестами кода и казалось бы бесконечных ошибок на фронтенде, не испугало Владимира.

Ценю его вклад в развитие проекта и доведение его до LIVE версии, а также помощь другим членам команды.

EDUCATION

Faculty of Economy, Finances and Credit

2003 — 2008

Mari State Technical University, Yoshkar-Ola city

INTERESTS

One of my biggest passions for last 3 years - is programming!

When I have some spare time I like to read some articles from <https://medium.com/> and <https://rubyweekly.com>.

They are mine favorite digests.

When I have more time I'm trying new technologies, new gems, plugins, APIs so on.

Last interesting technology I tried was AWS Rekognition API

(<https://aws.amazon.com/rekognition/>)

I was too interested in this tool so that I developed my own gem for Ruby On Rails

(<https://github.com/wowonrails/aws-rekognition-client>).

I'm sportsman and trying to visit gym at least of 2 times per week.

My favorite fitness direction is workout.

One day I'm planning to run a marathon and make 50 pull-ups.

For now my best result is 17 pull-ups.

Also I love to spend time with my family.
